Objective

To complete my 160 hours of field placement for my computer programming and analysis course at Durham College.

Skills and Abilities

Interpersonal communication skills

Leadership and management

Ability to work independently in a fast paced environment

Computer Skills

Can handle cash, prepare bills and make payments

Organization

Strong work ethic

Analytical ability

Growth mindset

Active Listening

Adaptable

Education

September 2021 - Present | Durham College

Advanced Diploma in Computer Programming and Analysis

In my course, I've been taught the basics of programming and what it means to think like a programmer, as well as develop algorithms. I've delved into a variety of fields, including designing COBOL code on the mainframe, developing mobile applications with Flutter, creating console applications with C++ and Java, and exploring web development with PHP, Java, Ruby, and JavaScript (both front end and back end with Node.js), along with HTML and CSS. Additionally, I've worked with frameworks such as Rails, Spring, Express, and Laravel. I have also developed Windows Form apps using C# on the .NET framework, as well as web pages using ASP.NET.

Oshawa, Ontario

Work Experience

April 2022 - June 2022 | Fundraiser | Global Faces Direct

Oshawa, Ontario

I was a fundraiser for different non-profit organizations such as CNIB and CamH. I went door to door informing people while also trying to raise funds for said organizations.

Extra-Curricular

February 2019 - Present | Producing Music
